EXPERIENCE

Data & Analytics Engineer | Cloud Data Architecture (Present)

Geólogos Asociados

May 2026 - Present, Buenos Aires - Remote

- **Dimensional Modeling & Architecture:** Designed data models on AWS RDS (PostgreSQL) and analytical layer on S3/Glue, structuring Star Schema (Fact & Dim) for timesheets, expenses, and profitability.
- **Transformation & Data Quality:** Modular SQL transformation layers (Medallion architecture / dbt approach) with automated integrity checks, null handling, and deduplication.
- **Cloud Optimization (FinOps) & BI:** Serverless AWS re-engineering (Lambda, VPC, Secrets Manager) and BI reporting, slashing cloud operating costs by 73% ($85 to $23 USD/mo).

Data & BI Engineer | Internal Systems (1y 1 month)

SRK-Consulting

May 2025 - May 2026, Buenos Aires - Remote

- **Databases & Pipelines:** Modeled relational schemas in PostgreSQL (dbDiagram/UML) to centralize consultant timesheets, budgets, rate cards, and engineering projects.
- **Analytical Views & SSOT:** Advanced SQL queries (CTEs, Window Functions) for utilization and budget variances, plus Python/Node.js services as Single Source of Truth.

Data Integration & BI Analyst → Product Data Lead (1y 10 months)

Flexways (Promoted)

Jul 2023 - Apr 2025, Buenos Aires - Hybrid

- **B2B Ingestion & Normalization:** Integrated and parsed global brokers (Booking, Despegar, etc.) with heterogeneous contracts (JSON, XML, SOAP, REST) into unified relational schemas.
- **Fleet & Pricing Analytics:** Operational fleet modeling (real-time availability, dynamic pricing, maintenance) and Python reconciliation scripts.
- **Business Intelligence in Metabase:** Interactive Metabase dashboards and SQL queries monitoring conversion funnels, utilization rates, and commercial performance.

Operations & Data Automation Analyst (2y 11 months)

Devborn

Jul 2020 - May 2023, Buenos Aires - Remote

- **Operational Pipelines & Lightweight ETL:** Automated extraction and synchronization across HubSpot CRM, Google Workspace, and Zapier (Apps Script/Python), saving +15 hrs/week.
- **Funnel Modeling & Reporting:** Structured databases and tracking dashboards measuring conversion metrics, cycle times, and operational bottlenecks.

EDUCATION

Bachelor of Science (B.S.) in IT Management

UADE - Buenos Aires, Argentina

Jun 2021 - Jun 2026

Chemical Technician

ORT - Buenos Aires, Argentina

Jan 2011 - Dec 2017

SUMMARY

B.S. in IT Management & Chemical Technician focused on Data & Analytics. Specialized in transforming transactional data into dimensional models, cloud ELT pipelines, and BI dashboards to ground decision-making and understand business reality.

- Dimensional Modeling & SQL
- Data Quality & Governance
- Cloud Pipelines (AWS & GCP)
- Process & Business Vision

SKILLS

Analytics & Data Engineering

Dimensional Modeling: Star Schema (Fact & Dim), Medallion Architecture

SQL & Transformation: Advanced SQL (CTEs, Window Functions), dbt, Data Quality

Databases & DWH: PostgreSQL (AWS RDS), BigQuery, MySQL, DuckDB

Pipelines, Cloud & Languages

Python & Ingestion: Python, Polars, Pandas, httpx, APIs (REST, SOAP, XML, JSON)

Cloud & Orchestration: AWS (S3, Glue, Lambda), GCP (BigQuery), AWS SAM, CI/CD

Business Intelligence & Design

Visualization & BI: Metabase, Power BI, Looker Studio, KPIs & Funnels

Architecture & Docs: dbDiagram, UML, Lucidchart, OpenAPI/Swagger

Languages

Spanish Native

English B2 - Upper Intermediate

German A2 - Beginner
