EXPERIENCE

Cloud & Software Application Developer (Present)

Geólogos Asociados

May 2026 - Present, Buenos Aires - Remote

- Architected and deployed serverless cloud infrastructure (IaC) on AWS using SAM and CloudFormation (VPC, RDS PostgreSQL, Cognito, Secrets Manager), achieving zero-touch, fully reproducible deployments.
- Engineered cloud FinOps and cost optimization, reducing projected AWS monthly expenditure by over 70% (\$85 to \$23/month) by replacing VPC endpoints with an optimized NAT instance and decoupling services.
- Developed scalable RESTful APIs on AWS Lambda (Node.js) with decoupled layer architectures, automated GitHub Actions CI/CD pipelines, and versioned database schema migrations.

Software Application Developer (1y 1 month)

SRK-Consulting

May 2025 - May 2026, Buenos Aires - Remote

- Designed and automated scalable cloud-native and on-premises infrastructures, connecting telemetry sensor monitoring systems with high-performance architectures.
- Produced structured technical documentation and data models using dbDiagram, UML diagrams, and user journey workflows in Miro and Notion.

Technical Product Owner + Channel Analyst (1y 10 months)

Flexways (Promoted)

Apr 2024 - Apr 2025, Buenos Aires - Hybrid

- Collaborated on digital transformation and AI integration, defining product short-term roadmaps and prioritizing high-impact deliverables.
- Bridged stakeholders with development teams, translating complex requirements into detailed user stories, acceptance criteria, and KPI metrics.

Jul 2023 - Apr 2024, Buenos Aires - Hybrid

- Designed dynamic Metabase BI dashboards and analyzed sales performance, defining API requirements and automating daily routines with Python scripts.

IT Recruiter + Operations Analyst (2y 11 months)

Devborn - Jul 2020 - May 2023, Buenos Aires - Remote

- Automated recruitment workflows via Google Apps Script, integrating Zapier, HubSpot CRM, and Google Workspace to eliminate manual data entry and save 15+ hours weekly.
- Designed candidate tracking schemas and operational databases to accelerate screening cycles and enhance technical pipeline visibility.

EDUCATION

Bachelor of Science (B.S.) in IT Management

UADE - Buenos Aires, Argentina

Jun 2021 - Jun 2026

Chemical Technician

ORT - Buenos Aires, Argentina

Jan 2011 - Dec 2017

SUMMARY

Software Engineer & Technical Product Owner with an end-to-end perspective: combining solid technical foundations in AWS cloud architectures, microservices, and data with user-centric discovery, agile delivery, and business impact.

- Passionate
- Proactive
- Curious Soul
- Versatile

SKILLS

Cloud & Infrastructure

Cloud Services: AWS (Lambda, API Gateway, S3, RDS, SAM)

Access & Identity: AWS IAM (Least Privilege), Cognito, RBAC

DevOps & Containers: GitHub Actions (CI/CD), Docker, Git

Development & Data

Languages: Node.js, Python, Java

Databases: PostgreSQL, MySQL, MongoDB, Redis

Data Viz & BI: Metabase, Power BI, Looker Studio

Product & Methodologies

Agile Frameworks: Scrum, Kanban, Sprint Planning (Jira, Notion)

Strategy & Discovery: User Stories, Acceptance Criteria (Gherkin), Miro

Functional Specs: UML Diagrams, Data Models (dbDiagram, Lucidchart)

Languages

Spanish Native

English B2 - Upper Intermediate

German A2 - Beginner
