EXPERIENCE

Software Application Developer (9 months)

SRK-Consulting

May 2025 - Present, Buenos Aires - Remote

- Design and automate robust, scalable cloud-native and on-premises infrastructures, bridging the gap between technical architecture and secure, high-performance systems.
- Standardize operational workflows by developing custom scripts to transform complex deployment into automated processes.
- Collaborate on product strategy to solve user journeys, aligning technical constraints with client requirements and producing clear traceable documentation for complex data models.

Technical Product Owner + Channel Analyst (1y 10 months)

Flexways (Promoted)

Apr 2024 - Apr 2025, Buenos Aires - Hybrid

- Collaborated on digital transformation and AI integration, defining product short-term roadmaps and managing backlogs.
- Bridged the gap between stakeholders and development teams, translating complex requirements into detailed user stories and clear acceptance criteria.
- Analyzed product performance through KPIs and user feedback to drive continuous improvement and implement AI-driven operational enhancements.

Jul 2023 - Apr 2024, Buenos Aires - Hybrid

- Designed dynamic dashboards and analyzed sales performance to identify trends and patterns, providing the data-driven visibility needed for strategic decision-making.
- Defined operational workflows and API behaviors, acting as a technical translator to align complex business requirements with IT,
- Optimized daily operations through custom scripts and automations.

IT Recruiter + Operations Analyst (2y 11 months)

Devborn - Jul 2020 - May 2023, Buenos Aires - Remote

- Automated recruitment workflows via Google Apps Script, integrating Zapier, HubSpot, and Google Workspace.
